

In the morning of German local time, 15th, June, the Eighth Training Abroad for Senior Executive on new energy held its opening ceremony in Aachen University. The deputy general manager of State Grid Corporation of China (SGCC) Zheng baosen, assistant Ma zhizhong, chief engineer Zhang liying, German Agency for Technical Cooperation (GTZ), GTZ energy projects director Mr. Stefan Opitz, , Professor Amin Schnettler from Aachen University attended the opening ceremony.

Zheng Baosen, the deputy general manager, on behalf of SGCC, general manager Liu Zhenya, and all trainees, delivered their appreciation to GTZ for the meticulous arrangements of the training course.

Mr. Zheng pointed out that after 25 years cooperation between GTZ and China, it established a very good Relationship with SGCC, moreover, both sides carried out extensive exchanges and cooperation in the fields such as energy management, sustainable development, corporate social responsibility and so on. SGCC, the world's largest power utility companies, adhere to clean energy dedication, promotion of economic development, as well as serving the harmonious society, so as to build a world-class power grid and enterprise which can deliver strong power grid, high-quality service and excellent performance of modern companies.

Mr. Zheng also required all the trainees to cherish the valuable opportunity, commit themselves to the training. They should open their mind, and renew their ideas, so as to master Germany's experience on new energy development, comprehensively improve the quality and capacity of their own, and make sure the training abroad becomes a worthwhile trip.

At the opening ceremony, director of GTZ energy project Mr. Stefan Opitz presented the overall development Strategy and management condition of GTZ, Amin Schnettler from Aachen University introduced the general information of the university. International Department of SGCC made a brief introduction on the cooperation, and wind power development status in China.

After the opening ceremony, all the trainees visited the Administration Building and C Student Center in an ultra-modern style at Aachen University. Shortly after that, Trainees started their study. The famous power system Professor, Mr. Amin Schnettler, and the well-known wind power professor, Mr. Jens Peter Molly, gave two lectures on "renewable energy resources and network access" and "Wind the development of electricity - now and future trends."

During the lectures, Trainees actively involved and created a interactive learning atmosphere, which have been highly praised by Professor training.
